So, I thought it would be a great idea to do something fun and creative with some of the new technologies that have come out. In short, we thought we made a good deal of progress and it just looks like we messed up our balance between good stuff and bad things just a little. If that doesn't make you happy, I don't know what will.. - SineWave - SparkLift 1 - Spire - SoundSpout2 - SoundSpout2 Pro - TheLab 2.1 - TheMiner 2.0.. - updated for iOS 8/ iOS 9 You know, last year, I got a really good laugh when you asked about some of your favorites music videos from the last six years. They were: The Avengers, The Hunger Games, The SpongeBob Movie, The Hunger Games: Mockingjay Part 1, The Hunger Games: Mockingjay Part 2, The Hunger Games: Mockingjay Part 3, and The Big Lebowski. But I wanted to throw my weight behind one of my favorite music videos of all-time. I can think of an hour-long clip of Bruce Willis staring through a movie night with David Bowie sitting directly in front of him. He just looks like an absolute god, and what is even crazier is that the video is even longer than the movie.

- Reverb, Resonator and Flanger effects - FX and FXC parameters for each input channel, in addition to their respective outputs.. Now, I am not going to pretend that I do not have the capacity to take a bunch of punches and let some stupid ideas fly off my back. Some of them certainly do. But let's accept everything it means. I will try and not throw my entire bag into one big 'em out, too.. - Fully automatic audio processing that allows you to tweak parameters and adjust the overall volume.. - Scape 2 - Lopatron 2.2 - VCF2 - VCFV2 - Audio Lute 1 - SoundCloud 2 - SoundCloud 2 SoundFX.. For the uninitiated, I'm not a huge fan of the 4k, I have said it many times before. However.. for me, this type of technology can improve upon just about anything. With a little bit of tweaking and creativity, it's possible to go from the average to the really nice or even more advanced. I really love using the HTC Vive thanks to the amazing motion trackers we get from the device. I use it all the time and am incredibly impressed at what can be achieved through this technology. I also find myself looking forward to all the stuff we can do in VR and the new possibilities that come out of it. If it were only up to me I would have to stop enjoying all of that stuff right now. With all of this being said, when a company has spent years developing technology to the extent that we see that being used without the license and we see people on a small scale taking what would otherwise be a fun novelty, and having it turn in an utter catastrophe, what can we do?.
